

Doctors' National Advisory Council

The CFO Doctors' National Advisory Council ("National Council") is one of CFO's most important resources. The National Council primarily serves as an unpaid, voluntary **focus group** to help CFO management in their mission to help doctors. National Council members are carefully selected, broadly diversified, physicians, dentists and non-doctor professionals from around the country. Doctor-members provide leadership to their colleagues, as well as advise and consult with CFO on a variety of important issues facing doctors today.

Non-doctor professional-members are also available to provide feedback to the doctors by sharing their experience, perhaps even providing a "second opinion." Non-doctor professional-members also consult with CFO on a variety of important issues facing doctors today.

As a courtesy to these doctors, attorneys and CPA's and in recognition of their privacy, please contact our office to obtain their contact information, and for us to give them a "heads up" to expect your call and to properly introduce you.
